Secure Data Destruction & Electronics Recycling

The secure destruction of your data and recycling of electronic business assets and consumer electronics is vital to **protecting you** and our environment. Our services will provide you with confidence that your **vital information** will never be seen again.

Services Include:

Electronics Recycling

- Computer Towers, Laptops and Devices
- Monitors and TV's
- Networking/Server Equipment
- Cell Phones/Tablets
- Boards/Processors/Memory
- and more

Secure Data/Hard Drive Destruction at your location or ours

2017 RECYCLING SUCCESS

The Tri-County Recycling Program accepts material from most Northeast Wisconsin and Upper Michigan communities. Over 100,000 tons of recyclables are processed each year utilizing staff from a two-shift operation.

Recyclables that are collected curbside and from drop-off centers are brought to the publically-owned and operated facility located in Appleton, Wisconsin.

The Tri-County Recycling Facility is where the recyclables are:

- **Separated** from one another by hand and by high tech sorting equipment
- **Compressed** into storage bales for easy shipping
- **Marketed** and sold to companies to be re-manufactured into a wide array of new products

Last year nearly **115,000 tons** of material were diverted from the regional landfill and recycled. Our highest year yet!!!

This represents more than 7,670 semi truck loads!

The Tri-County Recycling Facility continues to be a centerpiece of Wisconsin's recycling industry, creating jobs, protecting the environment, conserving resources and encouraging all to

Recycle More... Landfill Less.

Group tours are available by calling 920-968-5721.

*Tours are offered M - F, 8:00 am to 3:00 pm.
2nd Shift tours are available upon request.*

TOP 5 recycling questions

1

What do I do with plastic bags?

Plastic bags are highly recyclable, but **NOT** through your curbside program. The Tri-County Recycling Facility is not designed to remove plastic bags and the bags wrap around equipment causing maintenance issues. Please take your plastic bags, wraps and other film plastics to a local retail or grocery store to be recycled.

2

What plastics can I recycle?

All Plastic Bottles, Cups & Containers:

- Soda, Water & Other Drink Bottles
- Food & Household Bottles, Jars and Jugs
- Dairy Containers & Lids
- Produce, Bakery & Deli Containers

Empty & rinse all bottles and containers.
Replace caps and lids.

3

How clean is clean?

A quick rinse of your bottles and containers is usually sufficient.

However, for stubborn foods like peanut butter jars here's a tip: Fill the jar with hot, soapy water and give it a good shake. Let the jar soak overnight. The next day, empty and recycle.

4

What should I do with shredded paper?

Shred paper into a paper bag - staple it closed - label the bag - put it in your curbside container.

This method keeps small pieces of paper from blowing around the neighborhoods while sitting at the curb, during transportation and at the recycling facility. **DO NOT use PLASTIC bags!**

5

What do I do with Styrofoam?

The Tri-County Recycling Program does **NOT** accept Styrofoam as very few markets are available.

Consider a reuse option for Styrofoam, otherwise place it in the trash.

Curbside Recycling Guide

Place recyclables loosely in your bin. ***No PLASTIC BAGS!***

Plastic

ACCEPT:

ALL plastic bottles, cups & containers

- Household bottles, jars & jugs
- Dairy containers & lids
- Produce, bakery & deli containers & lids

DO NOT ACCEPT:

- Plastic bags, wrap or film
- Motor oil bottles
- Styrofoam

empty, rinse and replace caps & lids

Paper

ACCEPT:

- Newspapers & inserts
- Cardboard & paperboard (food boxes)
- Milk, juice & soup cartons
- Office & school paper
- Junk mail & catalogs
- Phonebooks, books & magazines

DO NOT ACCEPT:

- Tissue paper
- Pet food bags

*shred paper in a paper bag & staple shut
flatten & cut boxes to 2ft by 2ft*

Metal

ACCEPT:

- Aluminum bottles & cans
- Steel & tin cans
- Empty aerosol cans

DO NOT ACCEPT:

- Aluminum pans or foil
- Empty paint cans
- Scrap metal

empty and rinse

Glass

ACCEPT:

- Food and beverage bottles & jars

DO NOT ACCEPT:

- Window glass
- Ceramics, china
- Drinking glasses

empty and rinse

www.RecycleMoreTriCounty.org

Recycle Right

Want to help recycling efforts in Northeast Wisconsin? Learning what is and is not acceptable may help your program.

To help keep recycling program costs low, keep the recycling facility running smoothly and to maintain the high quality of material we sell to local manufacturers, we ask people in Northeast Wisconsin to brush up on which items go in your recycling bin and which items stay out.

PLASTIC BAGS - WRAPS - FILM

Many types of plastic are accepted in your curbside bin, but “plastic bags, wraps and film” are NOT because they twist around and clog the sorting equipment, preventing proper separating of the paper material from the containers. The plastic bags and film must be cut out of the sorting screens and landfilled because they are too dirty to be recycled. In order to recycle plastic bags and film, the material needs to stay clean and dry, which works best coming from our homes directly to a store drop-off.

TANGLERS

Clothing, bedding, rope/twine and hoses are known as “tangles,” another major problem material we find in the recycling stream. Similar to plastic bags, tangles also wrap around and clog the sorting equipment. Employees at the facility must climb into each sorting screen to cut and remove the tangles and plastic film from the screens. This is a labor intensive and dangerous job. Tangles also come at a cost to the program as landfill disposal fees are incurred to throw the unusable material away. We recommend donating clothing and bedding or throwing them in the garbage.

To find a sharps disposal location visit: <http://dnr.wi.gov/topic/healthwaste/householdsharps.html> or call the Department of Natural Resources at 608-266-2111.

To find a plastic film drop-off visit: www.plasticfilmrecycling.org.

SHARPS

The most serious contamination issue we encounter is the improper disposal of “sharps” - needles, lancets and syringes. When people discard used sharps in plastic or glass bottles they sometimes end up in the recycling bin. When these bottles arrive at the facility they often break open, spilling their contents onto the conveyor belts. The conveyor belts must be stopped to remove the sharps which can take several minutes and occurs daily. When the facility stops production, operational costs increase and we face unnecessary fees to properly dispose of the misplaced sharps. Most importantly though, employees who hand sort the recyclables may develop serious health issues resulting from an accidental needle stick. Please remind family members or friends who use sharps to properly dispose of their sharps containers at a designated collection location, not in the trash or recycling bin.

Composting

Composting is Mother Nature's recycling method. By composting our food wastes and yard materials we can reduce the amount of trash put into landfills. In return, we create an all natural soil amendment which eliminates the need to use harsh fertilizers on our lawns and gardens.

WHAT YOU'LL NEED

- Compost bin, either manufactured or homemade (you can also leave the compost in a "heap," but this may be unsightly in urban areas)
- Lawn and garden clippings, dry leaves
- Food scraps, such as fruit rinds, coffee grounds, vegetable scraps, egg shells, etc. (No meat or oily foods)
- Water source
- Pitch fork for turning

GETTING STARTED

Compost "recipes" vary among gardeners, but a good rule of thumb is 50 percent "green" material like grass clippings and food scraps, to 50 percent "brown" material such as dry leaves, and wood shavings. The "green" is rich in nitrogen and will keep the pile hot. The "brown" material adds carbon to the mix and will keep

the pile cool. Both work in concert to create the right blend for maximum compost creation.

Place your compost near a water source for easy watering in case your pile needs moisture. Your compost pile should feel like a rung-out sponge and smell earthy. If odor issues exist, you should turn the pile with a pitchfork to add oxygen and consider adding some "brown" material as well.

Depending on how carefully you manage your pile, composting can take from 1 month to 2 years. Most piles that are turned weekly and kept at the right moisture level can produce completed compost in about 6 to 8 weeks. Once your pile is a rich, dark color and you can hardly identify the materials you added, you have a finished product.

PROBLEM SOLVING FOR ODOR OR PESTS:

- **Odors:** These are usually caused by too many "greens" or the "greens" were not adequately stirred into the mixture. Try mixing in more "browns".
- **Rodents or animals:** Rodents are usually attracted to fatty foods or meats, which should not be added to the compost.
- **Moisture:** Too much or too little can cause problems. Cover your compost during rainy weather to avoid over-wetting and rotting. Sprinkle a little water on the pile only in periods of drought. The moisture consistency should remain that of a wrung-out sponge.

Outdoor Burning in Wisconsin

Spring is usually the worst time of year for wildfires in Wisconsin. For this reason, local ordinances and state regulations govern outdoor burning, open burning, burn barrels and fire pits. Although the Wisconsin DNR discourages property owners from outdoor burning, be sure to follow these guidelines if you do decide to burn.

Since most paper and cardboard is recyclable, there are few instances when burning paper and cardboard is acceptable. Clean and dry untreated wood, brush, leaves, needles and grass may be burned, but composting or leaving plant debris on the ground is preferable to burning this organic material.

Burning garbage is prohibited anywhere in Wisconsin. Garbage includes plastic or rubber items, electronics, shingles, asphalt, foam, furniture, carpet, wire, metal, aluminum, vinyl products, tires, oil-based products and painted or treated wood. Burning these materials can emit harmful dioxins, acid vapors, carcinogenic tars and heavy metals into the air.

Depending on which county you live in or if you are visiting “up north”, a state burning permit may be required. Certain counties require a state burning permit all year while others only require one from January 1 to May 31. Be sure to check with the local municipal office or go to dnr.wi.gov and search “fire.”

Campfires used for cooking, warming or entertainment do not require a state burning permit and are allowable

anytime except during emergency burning restrictions. However, local ordinances may prohibit all outdoor burning, including campfires or outdoor fireplaces, so check on local ordinances.

If you choose to engage in outdoor burning, be sure to follow local rules and regulations and be safe to protect Wisconsin's environment!

ELECTRONICS

Free disposal is a thing of the past...

Wisconsin's E-Cycle law was created as a "product stewardship" model, which simply means whoever manufacturers, sells and purchases a product is responsible for managing the disposal of the product at the end of its life.

Manufacturers selling electronics in Wisconsin have an annual target to recycle a certain amount of electronics according to the weight of their sales within the state. Retail stores who sell electronics may only sell brands of electronics from manufacturers who are registered in the E-Cycle program and must report their sales to the state. Retailers are also required to educate customers about recycling requirements.

Customers are responsible for proper disposal of their electronics with a reputable collector or recycler.

When the E-Cycle program started in 2010, the end markets for

the electronic components were strong and reliable. Wisconsin witnessed an increased number of electronic recyclers and collectors. Today however, markets for electronic materials, particularly the leaded glass market for old tube televisions, have nearly dried up. This results in a higher cost to recycle.

Taking into account the current state of electronic materials end markets, most nonprofits, retailers and local governments are unable to provide free collection events as they once had. While some collectors have ceased operations all together, those who continue to offer electronics recycling services have had to make program changes, including increasing fees or limiting acceptance of certain devices.

The Wisconsin Department of Natural Resources continues to work with e-waste stakeholders to address the challenges facing the E-Cycle program. Potential solutions and ideas have been discussed in hopes to make changes in the program to bring better results.

State law requires the following items to be recycled:

- **Televisions**
- **Computers** (desktop, laptop, notebook and tablet computers)
- **Printers/scanners/copiers**
- **Computer monitors**
- **Computer accessories** (keyboards, mice, speakers, hard drives and flash drives)
- **E-readers**
- **DVD, VCR and DVR players**
- **Fax machines**
- **Cell phones**

Reducing Food Waste In Wisconsin

We all know that recycling is good for the environment and the economy, but what can we do to reduce the amount of material we send to landfills?

The answer for many families and communities begins with reducing the amount of wasted food. Nearly 20% of the food we buy never gets eaten. As consumers we need to take an inventory of what we have in our cupboards and refrigerators and basically buy less. We also need to be willing to buy an “ugly” looking carrot or tomato. These fruits and vegetables have the same taste and nutritional value, but produce that doesn’t look picture perfect get thrown out by grocers. By shopping smarter, a family of four could save \$1,500 a year if they reduced the amount of food they purchased.

The next step to reduce food waste is to feed hungry people. Many local grocery stores offer their day old bakery items and perishable items to local food pantries. This is great, but what about all the leftover prepared food from delis, restaurants, hospitals, schools and special events? The Federal Bill Emerson Good Samaritan Food Donation Act protects businesses from liability when donating food to a charitable organization such as a soup kitchen.

Once we’ve fed people, any leftover food scraps or waste from the preparation of food can be donated to local farms to help feed livestock. Further steps to reduce food waste include anaerobic bio-digestion, composting and lastly landfilling. Material from Brown County’s food waste drop-off program is sent to UW-Oshkosh which operates an anaerobic bio-digester that accepts food waste from restaurants, cafeterias,

and grocery stores generating energy and compost. Using a backyard compost bin for food scraps at home can also reduce the amount of food that is landfilled and creates a beneficial soil amendment.

Following these easy steps, we can reduce the amount of wasted food all areas of food production, and reduce the amount of material that is landfilled by as much as 25 percent.

For more information on reducing food waste:

www.feedingamerica.org

2018 Agriculture and Household Hazardous Waste Clean Sweeps

Farmers, qualified businesses and rural residents are encouraged to participate.

Acceptable Materials: Pesticides, herbicides, poisons, dioxins, solvents, lead and oil bases paint, gasoline in original containers, toxic cleaners, mercury and unknown chemicals.

Unacceptable Materials: Latex paint, light bulbs, electronics, appliances, gas cylinders/tanks, batteries, motor oil/coolant, tires, explosives/ammunition, radioactive material (smoke detectors), medications, sharps, bio-hazard wastes and medical wastes.

WINNEBAGO COUNTY RESIDENTS & FARMS: APPOINTMENTS ARE REQUIRED.

Visit www.WinnebagoCountyCleanSweep.com to book your appointment. No internet access? Call 920-232-1850. Appointments will be accepted after March 1, 2018.

- City of Omro Fire Department
Friday, April 20, 9 am – 11 am
- City of Menasha Public Works
Friday, April 20, 3 pm – 6 pm
- City of Neenah Public Works
Saturday, June 9, 9 am – 12 noon

If you have household hazardous wastes, please consider using our seasonal facility, which is open on select Wednesdays and Saturdays, May – October. See page 28 for more information.

OUTAGAMIE COUNTY RESIDENTS & FARMS:

APPOINTMENTS ARE REQUIRED.

Email recycle@outagamie.org to book your appointment. No internet access? Call 920-968-5721. Appointments will be accepted after March 1, 2018.

- Shiocton Highway Garage
Friday, April 13, 9 am to noon
- Have household material and are unable to make this date? Consider using our seasonal facility open on select Wednesdays and Saturdays, May – October. See page 24 for more information.

The Agriculture and Household Hazardous Waste Clean Sweep Program is funded by Winnebago County Solid Waste, Outagamie County Recycling & Solid Waste, Wisconsin Department of Agriculture, Trade and Consumer Protection grant funds and user donations.
For state-wide locations visit: https://datcp.wi.gov/Pages/Programs_Services/CleanSweep.aspx

Where You Put It Affects Others

Over 8 million people in the U.S. use sharps to treat all sorts of medical conditions in the home and the number of conditions treated at home with injectable medicines continues to rise.

Wisconsin law prohibits all sharps including needles, syringes and lancets, from being disposed of in household trash or with curbside recyclables.

NEVER PUT USED SHARPS IN THE TRASH OR IN YOUR RECYCLING!

The Tri-County Recycling Facility is finding an increased number of used needles being improperly disposed of in the household recyclables. Improper sharps disposal is a serious public health risk due to the potential for accidental needle sticks during the hand sorting of recyclables. Accidental needle sticks may cause severe infection and may also spread communicable diseases such as Hepatitis and HIV/AIDS.

GUIDELINES FOR ALL SHARPS USERS:

- Place used or discarded sharps in an acceptable sharps container.
- Take used sharps to a designated collection facility for proper disposal.
- Do not place used sharps in coffee cans, plastic milk jugs, plastic bags, aluminum cans or soda bottles. These containers mistakenly end up in recycling collection trucks and burst open.

For a complete list of sharps collection locations visit the Wisconsin DNR website and search *sharps collection site*.

For Residents Only.
No clinic, hospital or
business disposal.

MEDICATION DROP-OFF GUIDELINES

Don't flush, pour, or trash unused medications. Pharmaceutical waste may create a risk to public health through accidental poisonings, drug diversion/abuse and drinking water contamination. Northeast Wisconsin residents can safely dispose of unused medications free of charge by following these simple guidelines.

10 STEPS to Recovering Recycling

- 1 COLLECTION:**
Trucks usually collect curbside recycling every other week.

- 2 TIP FLOOR:**
The trucks empty recyclables onto the tipping floor.

- 3 METERING BIN:**
This machine evenly meters the amount of recycling entering the facility.

- 6 PAPER SEPARATION:**
Disc Screens separate the paper from the containers. Workers look for items that don't belong in the paper. The paper is stored in hoppers until it is ready to be baled.

- 7 CONTAINER SEPARATION:**
Metal cans are removed from the conveyor belt by a large magnet. Employees and high-tech machines are used to sort plastics and aluminum.

4 PRE-SORT LINE:

The sorters remove items that may harm or interfere with equipment such as plastic bags, large metal items and trash.

5 GLASS COLLECTION:

Since glass is highly abrasive on conveyor belts and equipment, it is removed first and stored outside until it is shipped.

8 BALING:

The materials need to be compressed into bales for easy shipping to buyers.

9 SHIPPING:

When enough bales are created, a semi truck is loaded to deliver to buyers who remanufacture the material into new products.

10 SALES OF THE MATERIAL:

Paper: sold to local paper mills in Green Bay and Menasha
Plastics and Metal: sold mainly in the Midwest
Aluminum: sold to a beverage can recycler in Atlanta, GA
Glass: sold in Wisconsin

BROWN COUNTY

Hazardous Material Recovery Facility

Hazardous Material Recovery (HMR) Facility: 2561 South Broadway | Ashwaubenon

Questions: (920) 492-4950 or BrownCountyRecycling.org

Business and farm material by appointment **ONLY** (920) 492-4950

Residential Drop-Off Hours:

Thursdays – Noon to 6 p.m.

Saturdays – 8 a.m. to 2 p.m.

Product Exchange Room:

Thursdays – 1 p.m. to 6 p.m.

Saturdays – 8 a.m. to 2 p.m.

The Brown County Hazardous Material Recovery facility accepts material from households and small businesses that pose a threat to human health and the environment. These are materials that are flammable, poisonous, corrosive or reactive. The facility is available to residents of Brown, Outagamie and Winnebago Counties. Businesses and residents of other counties will be charged a fee to drop off material at the facility.

Acceptable Materials

- Flammable - paint, gasoline, paint thinners, solvents
- Corrosive - acids, bases, cleaning products
- Reactive - pool chemicals
- Poisonous/toxic - pesticides, cleaning products
- Other material (accepted for a fee) - fluorescent lights, ballasts, computers and electronics, cooking oil, propane tanks, oil, antifreeze, batteries

Unacceptable Materials

- Explosives, Ammunition, Black Powder
- Flares
- Sharps
- Biological Waste
- Infectious Waste
- Radioactive Material
- Pharmaceuticals

Materials that **cannot** be brought to the Hazardous Material Recovery facility include tires, infectious and biological wastes, sharps and pharmaceuticals, radioactive material, explosives, flares and ammunition. Visit our website www.BrownCountyRecycling.org for more information in regards to the disposal of these materials.

Product Exchange Room

- Much of the material brought to the facility is in good shape and doesn't need to be disposed of. Each year, 1,000s of paints, stains, thinners, pesticides, automotive products, cleaning products, etc. are placed in our Product Exchange Room for the public to take for free. This is a great place to find free material for home repairs.

What Do We Do With It?

- Most materials, like paint and solvents, are bulked into 55-gallon drums. These drums are removed by a hazardous waste contractor who further bulks the material for transportation to a company that uses it as fuel.
- Some materials, like pesticides, are packed into drums called loose packs. Loose packs are drums filled with smaller containers. These drums are sent to a disposal company for additional sorting.
- Acids and bases are sent for disposal in lab packs.
- Latex paint is sent to a company to recycle into new paint.

Household Sharps DROP-OFF SITES

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. It is illegal to put sharps in the trash or with recyclables.

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal. Sharps are accepted at many pharmacies, hospitals and clinics throughout Brown County. For specific drop off locations and program guidelines go to BrownCountyRecycling.org and click on “Sharps” on the right side of the page or call the Brown County Health Department at (920) 448-6400.

Participating business who may offer sharps collection include:

- Aurora Baycare Urgent Care-West
- Aurora Medical Group
- Bellin Health Clinics
- Bellin Memorial Hospital
- Brown County Health Dept.
- CVS Pharmacies
- Krider’s Pharmacy
- Lineville Health Mart Pharmacy
- Pick N Save Pharmacies
- Prevea Health Clinics
- Pulaski Health Mart
- Shopko Pharmacies
- Shopko Express
- St. Mary’s Hospital
- St. Vincent Hospital
- Walgreens Pharmacies

Used Oil DROP-OFF SITES

Did you know...

If you recycle just **two gallons** of used oil it can generate enough electricity to run the average household for almost **24 hours**?

Oil is a valuable, reusable material. It doesn't wear out – it just gets dirty. Used oil and filters brought to a collection site will be recycled and re-refined into clean motor oil or used as an alternative energy source.

Guidelines:

- Use a dirt-free container with a leak-proof lid.
- Do Not use containers that previously held household chemicals, such as cleaners, solvents, fuel (gasoline), paint or bleach.
- Do Not contaminate used oil with solvents or other material such as anti-freeze.

Call ahead for program information

Food Waste & Organics DROP-OFF PROGRAM

The Brown County Food Waste & Organics Drop-off Program is a pilot program that began in late 2014. Residents may bring compostable organic waste like coffee grounds, fruit peels and pizza boxes to a drop-off site.

The Food Waste & Organics Drop-off Program offers anyone, including avid backyard composters, the opportunity to keep nontraditional back yard composting materials like paper towels, napkins, meat and bones, dairy products and greasy pizza boxes out of our landfill.

WHY DIVERT FOOD WASTE FROM LANDFILLS?

Food waste makes up more than a quarter of the total waste stream. Reducing food waste has significant benefits including: reducing methane from landfills, reducing energy waste associated with food production and creates a valuable soil amendment.

The organic material collected is taken to the University of Wisconsin-Oshkosh's bio-digester, where the materials are broken down during a digesting process. The digesting process generates methane gas used to create electricity and a high quality soil amendment that is sold. The pilot program will help us evaluate and identify composting and other food waste disposal options.

Sign up now to bring your food waste and other organic waste to a drop off location by registering at BrownCountyRecycling.org/organics or call (920) 492-4950.

DROP-OFF LOCATIONS:

Brown County Recycling Transfer Station

2561 S Broadway,
Mon – Fri
7:30 am to 4:00 pm
& Saturday
8:00 am to 2:00 pm

Allouez Yard Waste & Waste Oil Site

E LeBrun St | Allouez
(Located off East River Dr)
Monday - Friday
8:00 am - 2:00 pm
Saturday hours change periodically

Create a Less Hazardous Home

Most household cleaning jobs can be accomplished with six simple ingredients. Although these ingredients are less hazardous than popular commercial products, they should still be used with caution. It's a good idea to wear gloves and eye protection when mixing and working with these basic ingredients, especially ammonia, and remember to label the bottle with the contents of the solutions you mix together.

Please note: These recipes have not been tested by formal researchers or consumer test groups. When trying a new recipe, first test it on a small, inconspicuous area to be sure you will get the results you want.

BASIC INGREDIENTS:

1. White Vinegar: Dissolves grease, dissolves mineral accumulation
2. Baking Soda: Deodorizes, mild abrasive
3. Fels-Naptha Soap: Laundry soap used for pre-treating stains
4. Washing Soda: Cuts grease, removes stains, softens water
5. Borax: Disinfects, deodorizes
6. Ammonia: Streak-free cleaner, antiseptic

BASIC RECIPES:

All-Purpose Cleaner

Mix 1 gallon hot water with 1/4 cup of white vinegar.

Toilet Bowl Cleaner

Pour 1 cup vinegar into the bowl, toss in a handful of baking soda. When it is done foaming, scrub and rinse with water.

Bathroom Cleaner

Use baking soda to scrub surfaces clean, then wipe surfaces with a solution of 1/4 cup vinegar in 1 gallon of water.

For Local Household Hazardous Materials Disposal Options:

Brown County page 18
Calumet County page 23
Outagamie County page 24
Winnebago County page 28

Dain Cleaner

As a preventative or if drain becomes clogged, pour in 1/4 cup baking soda, followed by 1/2 cup vinegar. Close drain until fizzing stops then flush with hot water.

Floor Cleaner

Mix 3 teaspoons each of borax and liquid dish soap in two quarts of hot water, works well on most flooring.

Window Cleaner

Mix one quart water, 3 drops dishwashing detergent and two tablespoons of ammonia.

Laundry Detergent

1 Box of Borax

1 Box Baking Soda

3 Bars Fels-Naptha, grated

Mix ingredients well

~Use 1 heaping tablespoon per load

If you have unused household chemicals, cleaning products or other products labeled **Caution**, **Warning**, **Danger**, **Corrosive**, **Flammable**, **Poison** or **Toxic** disposal information can be found at <http://dnr.wi.gov/topic/Waste/HouseholdHW.html>.

CALUMET COUNTY

Hazardous Waste Collections

Free disposal events are held on various dates throughout the year.

2018 Disposal Dates:

Appointments are necessary. Register online.

Fridays, 9-11 am:

April 27: Harrison Public Works Garage

May 18: Chilton Public Works Garage

September 7: Brillion Public Works Garage

Saturdays, 9-11 am:

April 21: New Holstein Public Works Garage

June 2: New Holstein Public Works Garage

August 4: Harrison Public Works Garage

Electronics RECYCLING

Collection events are held annually. State law requires most items to be recycled.

2018 Electronics and Appliance Collection:

Wednesdays, 1-6 pm

May 16: Chilton Public Works Garage

June 13: Harrison Public Works Garage

Medication DROP-OFF SITES

Never flush or pour! Safely dispose of drugs for free at various area locations.

OUTAGAMIE COUNTY

Hazardous Waste Collections

Outagamie County
"French Road Location"
3414 N French Rd | Appleton

ALL collection dates require appointments:
RecycleMoreOutagamie.org
920-832-5277

May: 9, 12
June: 6, 9
July: 18, 21

August: 15, 18
September: 12, 15
October: 24, 27

Acceptable Materials:

Automotive:

- Gasoline & Fuel Additives
(No on-site dumping of gasoline)
- Automotive Fluids
- Lead Acid Batteries

Cleaners:

- Solvents
- Drain & Oven Cleaners
- Pool Chemicals
- Toxic Household Cleaners
- Polishes & Aerosols

Garden and Lawn Care:

- Herbicides & Insecticides
- Fungicides/Pesticides
- Weed Killer
- Poisons

Miscellaneous:

- Mercury
- Oil & Lead Paints
- Varnish/Stain/Turpentine
- Paint Thinners/Strippers
- Spray Paints/Adhesives
- Wood Preservatives
- Kerosene

Unacceptable Materials:

- Latex Paint
 - Explosives
 - Ammunition
 - Smoke Alarms
 - Medical Wastes
 - Asbestos*
 - Bulbs*
 - Propane Tanks*
- *These items may be taken to the main drop-off site for a fee.*

No containers over 5 gallons

No trailer sized loads

Latex Paint Disposal

Latex paint is made from water and is not hazardous. If the paint can says to "clean with soap and water" it is latex paint.

Disposal Directions: **for SMALL amounts:** remove the lid and let dry. Occasionally stir the paint. **For LARGE amounts:** Line a box with a plastic bag. Place an absorbent material (kitty litter, oil-dry) on the bottom, pour a layer of paint and repeat as necessary. Dispose of dried paint and dry, empty paint cans in the trash.

Household Sharps

DROP-OFF SITES

To reduce public health risks such as accidental needle sticks, Wisconsin law requires all citizens to manage sharps safely. **It is illegal to put sharps in the trash or with recyclables.**

Sharps users are highly encouraged to place their used or discarded sharps in an acceptable sharps container and take them to a designated sharps collection station for proper disposal.

NEVER PUT SHARPS IN RECYCLING OR TRASH.

Battery Recycling

LOCATIONS

Laptops, power tools, MP3 players and cell phones are just a few of the battery operated devices that have become part of our daily lives.

Various types of batteries such as rechargeable and vehicle batteries contain toxic heavy metals that may harm our environment if they are not properly disposed. Recycling opportunities exist for these battery types, lessening the environmental risks.

Single-use, alkaline batteries (button type, AAA, AA, C, D, 6V, 9V) are NOT considered hazardous and can go into your trash.

Used Oil DROP-OFF SITES

Did you know...

Did you know... if you recycle just two gallons of used oil it can generate enough electricity to run the average household for almost **24 hours?** Oil is a valuable, reusable material. It doesn't wear out – it just gets dirty. Used oil and filters brought to a collection site will be recycled and re-refined into clean motor oil or used as an alternative energy source.

Guidelines:

- Use a dirt-free container with a leak-proof lid.
- Do Not use containers that previously held household chemicals, such as cleaners, solvents, fuel (gasoline), paint or bleach.
- Do Not mix with solvents or other material such as anti-freeze.
- Locations with a * symbol are for Outagamie County **residents and family farmers only.** (No factory farms or businesses).

PRODUCT EXCHANGE

Household hazardous material surrendered in good condition is available FREE to the public in the product exchange room. Check out our inventory during the household hazardous material collection hours.

ACCEPTABLE MATERIALS:

Household Cleaners

- Disinfectants
- Drain Cleaner
- Oven Cleaner
- Pool Chemicals
- Solvents/Degreasers
- Waxes/Polishes
- Aerosols
- Deodorizers

Lawn & Garden

- Herbicides
- Insecticides
- Fungicides
- Weed Killer
- Poisons
- Fertilizers

Auto & Home Maintenance

- Fuel Additives, Gasoline
(No onsite dumping of gasoline)
- Transmission Fluid
- Starter/Brake Fluid
- Oil/Lead Based Paint

Other Materials

Light Bulbs, Used Oil, Oil Absorbents & Filters, Anti-freeze, Auto Batteries, Tires, Electronics, TVs, Appliances and Propane Cylinders are accepted at the Winnebago County Landfill. Charges and restrictions may apply.

Business or Farm Hazardous Materials, Radioactive Materials, Infectious/Medical Wastes, Asbestos and Medications are not accepted at the Winnebago County Landfill or Household Hazardous Material Collection site.

- Spray Paint
- Varnish/Stain
- Thinners/Strippers
- Adhesives
- Wood Preservatives
- Driveway Sealer

Miscellaneous

- Light Ballasts (no fixtures)
- Household Batteries
- Mercury
- Fire Extinguishers
- Household Materials labeled with: Caution, Warning, Danger, Flammable, Combustible or Corrosive

UNACCEPTABLE MATERIALS:

- Radioactive Materials
- Infectious/Medical Wastes
- Asbestos
- Medications
- Latex Paint
- Business or Farm Hazardous Materials

Landfill Diversion RECYCLING

In an effort to reduce landfill waste, Winnebago County Solid Waste diverts a number of reusable materials from landfill disposal. Upon arrival, please notify the scale operator if you have:

Scrap Metal – steel, iron, aluminum, copper, brass and tin. No sorting necessary.

Construction and Demolition Materials – Clean wood, metal, drywall, vinyl siding (no treated/painted

wood or drywall, no asbestos containing materials, no concrete/aggregate, no trash). No sorting necessary.

Residential Asphalt Shingles – Clean asphalt shingles (non-asbestos) from residential dwellings of four (4) units or less and must be free from cedar shake, wood, metal and other debris/trash.

Electronics RECYCLING

Residents have many opportunities to recycle electronics.

The following electronics are banned from landfill disposal: televisions, computers, DVD/VCR players, fax machines, keyboards, mice, speakers, flash drives, hard drives and cell phones.
